

Deleting (One Data) Data from Database

```
var mongoClient = require('mongodb').MongoClient;
var URL = "mongodb://127.0.0.1:27017/";

mongoClient.connect(URL, function(error, myMongoClient){
    if(error){
        console.log("connection fail");
    }
    else{
        console.log("connection success");
        deleteData(myMongoClient);
    }
})

function deleteData(myMongoClient){
    var myDataBase = myMongoClient.db("school");
    var myCollection = myDataBase.collection("students");

    var deleteItem = {"roll":5};

    myCollection.deleteOne(deleteItem, function(error){
        if(error){
            console.log("Deletion fail");
        }
        else{
            console.log("Deletion success");
        }
    })
}
```

```
}  
  })  
}
```
