

Find (One Data) Data from Database

```
var mongoClient = require('mongodb').MongoClient;
var URL = "mongodb://127.0.0.1:27017/";

mongoClient.connect(URL, function(error, myMongoClient){
    if(error){
        console.log("connection fail");
    }
    else{
        console.log("connection success");
        findData(myMongoClient);
    }
})

function findData(myMongoClient){
    let myDataBase = myMongoClient.db("school");
    let myCollection = myDataBase.collection("students");

    let resultData = {roll: 4};
    myCollection.findOne(resultData, function(error, result){
        console.log(result);
    })
}
```
