Updating Database Data

```javascript
var mongoClient = require('mongodb').MongoClient;

var URL = "mongodb://127.0.0.1:27017/";

mongoClient.connect(URL, function(error, myMongoClient){

    if(error){

        console.log("connection fail");

    }

    else{

        console.log("connection success");

        updateData(myMongoClient);

    }

})

function updateData(myMongoClient){

    let myDataBase = myMongoClient.db("school");

    let myCollection = myDataBase.collection("students");

    let findData = {"roll": 1}

    let updatedData = {    :{"home": "Bogra", "id": 123456}};

    myCollection.updateOne(findData, updatedData, function(error, result){

            console.log(result);

    })
}
```
