# Inserting Data into Database

```javascript
var mongoClient = require('mongodb').MongoClient;
var URL = "mongodb://127.0.0.1:27017/";

mongoClient.connect(URL, function(error, myMongoClient){
    if(error){
        console.log("connection fail");
    }
    else{
        console.log("connection success");
        insertData(myMongoClient);
    }
})

function insertData(myMongoClient){
    var myDataBase = myMongoClient.db("school");
    var myCollection = myDataBase.collection("students");

    var myData = {"id": 12361, "name": "moshiur", "roll": 1, "home": "Fulbari"}

    myCollection.insertOne(myData, function(error){
        if(error){
            console.log("insertion fail");
        }
        else{
            console.log("insertion success");
```

```
        }
    })
}
```
